### 4.4. Policy on Educational Support

The provision of Educational Support of the European School Brussels 1 aims at students' academic success by promoting their self-esteem and development. The goal is to help students become self-reliant learners, be able to utilize multiple resources, understand their strengths and weaknesses, and to set realistic and achievable goals in learning process and evolution.

EEB1 will continue to strive to help each student develop their human potential and sense of dignity and self-worth. Our teaching will continue to strive to be student-centered. Everything possible will be done to help students, including those with disabilities and special educational needs, to develop their personality, talents and creativity to their full potential. The aim of educational support is to work towards maximizing academic and social development and move

towards inclusion. While we all come from different countries, educational systems and philosophies, our common goal is to see each student entrusted to us develop their full potential in an inclusive environment.

Support teachers work from the beginning of the year in collaboration with classroom teachers to identify specific needs, create a learning plan, and evaluate student achievement. Students can receive support at any time during their schooling.

EEB1 advocates a 'whole school approach' to special educational needs which involves all staff adhering to a model of best practices. The staff at the school is committed to identifying and providing for the needs of the student who attend. It is about creating a secure, accepting, collaborative and stimulating community in which everyone is valued. Through adopting the whole school approach, EEB1 can cater for students with diverse needs in a more comprehensive manner.

This approach aims at a cohesive response to diverse learning needs and solid implementation, as far as possible. Ideally, this needs to be achieved in a culture of ongoing improvement which sets high expectations, monitors students' progress and actively discusses student achievement. The goal is a student-centered education for life in the world beyond school, incorporating a European perspective. In order to optimize the teaching and learning process, it is vital to:

- set achievable targets which promote self-esteem and a positive attitude towards learning;
- encourage differentiation, supporting the learning process;
- work in partnership with students and their parents/legal representatives;
- promote collaboration among teachers;
- enable students to monitor their own learning and become independent learners on their own;

The school offers 3 types of support: general support, moderate support and intensive support (A and B).

For more information about the provision of Educational Support at EEB 1, please consult the [Educational Support Guidelines](#).

Reference can also be made to the procedural document of the Office of the Secretary General of the European Schools **2012-05-D-15-en-10 Provision of educational support in the European Schools**.

## 7. MEDICAL SERVICE

### 1) Infirmary

- The school infirmary provides first aid in case of small accidents or major discomfort occurring during the school day. If necessary, the first-aid nurse will phone the child's parents, and if needed, may call an ambulance to transfer the child to an emergency service location.
- The school infirmary is not meant to be a substitute for parents in the administration of the child's current care. In order for the nurse to devote the necessary time to children with real problems, parents must treat their children at home for all minor ailments such as: sore throat, ulcers, cold sores, verrucas, injuries, or sprains that occur outside of school according to the instructions of their attending physician.
- A child who is sick must rest at home in the hands of his or her parents, grandparents or nannies.
- If your child has a fever you will be asked to pick him/her up from school.
- In the event of a child with lice, you may be asked to take him/her home in order to avoid passing them on to other students.

### 2) Medical Service (Dr. Lassine and Dr. Nizette, school doctors).

European Schools follow the rules of their host country, and according to Belgian law, the medical examination is mandatory.

In accordance with school medical procedure, children in the following year levels will receive a medical examination during the school year: first, third, and fifth primary as well as second, fourth, and sixth secondary, and the last year of nursery.

The purpose of these examinations is to check the overall health and maturity of the pupil, inform parents, and, if necessary, offer help to aid in adapting to school, family, and social life.

The medical visit includes biometrics (height and weight), auditory and visual acuity control, and physical examination by the doctor (selective examination for special problems such as: scoliosis, flat feet, warts, heart murmur, foreskin constriction, etc).

No vaccinations are administered at school; please talk to your doctor or pediatrician. The basic immunization schedule is included in the school doctor's letter of notification, so that parents can learn about their child's immunization status.

During the medical visit the doctor cannot, under any circumstances, prescribe medication or write a medical certificate.

The medical service has an exclusively preventive function; early detection of physical deficiencies and optimisation of living conditions (school buildings). The school doctor does not have to examine a feverish or injured child. The school doctor does not perform curative acts, except in cases of extreme urgency (e.g. allergic shock...)

The school doctor does not replace the family physician. All examination results are communicated to the family physician by the parents (notification letter from the school doctor) to ensure a proper follow-up.

If the medical file (medical questionnaire) handed in by parents at enrolment is incomplete, the school doctor can, if necessary, call the child's doctor (designated by the parents). This is to better organize the welfare of the child whilst in school.

If you have a child with a chronic or seasonal illness that requires daily medication, kindly inform the school's infirmary in writing of the child's pathology and the medications they are taking on their own, or that we need to administer.

If there is a risk of a serious epidemic at the school, we insist on the cooperation of parents in order to identify the pupils who have been in direct contact with their child.

Parents wishing to meet the school doctor are invited to make an appointment by calling 02 / 374.94.95 (infirmary).

For obvious security reasons, parents of new students are asked to return the duly completed medical questionnaire (yellow sheets) before their child's first day of school. Thank you!

This service also supports and advises the students on what to do post-baccalaureate.

## 10. SCHOOL INSURANCE

Nikola Jacques is available for any questions relating to school insurance and may be contacted by e-mail [Nikola.jacques@eursc.eu](mailto:Nikola.jacques@eursc.eu).

Reminder of the provisions of Articles 33 and 34 of the General Rules of the European Schools concerning school insurance:

*“The School shall take out a collective insurance policy to cover the civil liability of a pupil’s legal representative in all cases where action could be taken against him/her as a result of an accident caused by the pupil to other pupils, to a member of staff or to third parties.*

*This insurance policy shall also cover reimbursement to pupils who are victims of accidents, or to persons entitled under them, of expenses (medical treatment, hospitalisation, etc.) incurred and payment of lump-sum compensation under the terms of the policy, which can be consulted in the School’s Secretariat.*

*In return for such cover the pupil’s legal representatives shall pay 85% of the premium fixed by the insurance policy.*

*The insurance cover provided for in this article shall be limited to personal accidents on school premises or on the way to and from school and during an outing organised by the school.*

*Cover for damage to property and other damage occurring off school premises shall be the responsibility of pupils’ legal representatives”.*

*“The school shall not be responsible for objects brought to school by pupils.”*

Please note that even though a parking space is provided for bicycles, scooters and motorcycles, they are left at the owner’s own risk.

Extra-curricular activities organised by CESAME (APEEE-Services) are also covered by the school’s insurance policy.

Under certain conditions, Ethias will reimburse damage sustained to pupils’ spectacles worn at the time of an accident as follows: frames - up to 25.00 € plus the total cost of the lenses.

The parents’/legal representatives’ share of the premium amounts to 6.50 € per annum per child enrolled at the school; this sum is to be paid to the school (see “School Charges” section).

Parents/legal representatives are reminded that, in the event of their child sustaining an accident at school, they must make photocopies of all relevant bills and receipts. These copies must be attached to the detailed account from the Health Insurance Scheme (*Caisse de Maladie/Mutuelle*) in order to obtain the reimbursement of the outstanding amount.

The contract covers accidents only to pupils on the way to and from school (even when unsupervised). Civil responsibility is therefore not covered.

2. Pupils who arrive late at school are also covered on their journey to and from school.

3. Pupils who leave school during the afternoon after their lessons but who return to school to catch the school bus are not covered by the school's insurance policy when outside the school grounds.
