

Citizens of the ocean world

Dear pupils, dear families, dear teachers, dear assistants,

Our school opens its doors for a **2nd edition** to **protect the oceans!**

Clean-up actions and "Here begins the sea" tags launched the season in March-April. In May-June, some classes will **meet authors and oceanographers**; **walks around the water** will be organized with the Municipality of Forest; **WWF and Greenpeace exhibitions** will take place in our premises, ... and other surprises that we will not reveal today ☺... until **June 8th, World Ocean Day.**

June 7th at 6 p.m.: a young person -Thomas Lesage- will address the young people of the school to share [his commitment to the ocean](#), during **a conference**. **Some classes will present their actions there. Students and families are warmly invited. Note the date in your diary.**

In 2021, a drawing competition on the ocean inaugurated this meeting. **This year, a recycled jellyfish mobile contest** is open to everyone. **From May 10th to 31st, 2022, drop off your jellyfish and its attachment system, without forgetting to write down your surname-first name-class.** The jellyfish will be presented under the courtyards.

On June 7-8th, student delegates and parent delegates will be invited to elect the best creations, in the 4 categories: *recycling – message for the ocean – originality – 3D.*

We hope that lots of you will be able to join us! Marine Gregoire and Mathieu Girot
