

In this section, you will find **readings of stories somehow related to the sea and the ocean.**

It's **a way of bringing the "Citizens of the ocean world" project to life as a link between home and school.** The idea is to allow parents and children, who wish so, to share with the entire school community stories that are part of their family tradition.

With this **virtual and multilingual library**, it is a piece of each family culture and intimacy that is shared.

Thank you all for enriching this exchange with your children's favorite readings. 😊
