

# Science Festival 2021/2022

We are very glad, that we could organize this hybrid Science Festival this year.

There were **50 pupils participated in 31 projects**. After the in-situ Science Festival on 20th January, we had an entire week when all the Science/Physics/Biology/Chemistry teachers had the opportunity to watch the projects online with their students and vote.

Because of the Covid rules, we had only **450 students** in the audience in the whole day, and we had **49 different classes** who watched **162 videos**. Total number of students was **2644**.

The jury panel (from different languages sections and scientific field) announced the final winners of the competition in the Senior and the Junior categories:

Juniors:

I. prize: Gabriel Nero and Nicolas Fourestié : L'hydrogène le gaz du futur ? (S2 FR-B)

II. prize: Maciek Kuik: Renewable energy from rain (S3 PL-B )

III. prize: Przemysław Kędra What will you remember? (S2 PL-B )

Seniors:

I. prize: Helena Domańska : How clean are your teeth? Toothpaste analysis (S4 PL-A)

II prize: Gabriel Guitart Stamatopol and Irene Moya Stamate: Study up: personalized study plans based on research and student experience (S7 ES-A)

III. prize: Julian Máthé and Marin de Vanssay de Blavous : RoomSafe – How physics can curb epidemics (S6 EN-A)

The audience vote for the best projects. The audience points was so close to each other, that exceptionally we announce 2 audience prizes this year.

The audience awards went to Maciek Kuik Renewable energy from rain (S3 PL-B) and the second prize went to Emmanuel Vlad Possibilités du Cerveau – les mystères des Rêves Lucides (S3 FR-B ) in Junior category.

The audience award went to Julian Máthé and Marin de Vanssay de Blavous for the project RoomSafe , and the second prize went to Anteja Puš with the project When and how will humans go extinct? (S4 ENA)

We could give valuable prizes for the winners (telescope, walkie-talkie, solar charger, magnetic hour glass, “casse-tetes”).

We are hoping, that this year the ESSS won't be cancelled. So the Jury has been decided to send Gabriel Nero and Nicolas Fourestié, Helena Domańska, Julian Máthé and Marin de Vanssay de Blavous and Lisa Banti to the ESSS. We hope that they will be successfully present our school in this competition at Strasbourg.

We all think, that the Festival was successful, and we are happy, that this year group had the chance to participate, work on their projects, like they had it in the previous years.

The Science Festival Team

(Dorottya Csonka, Jesper Frederiksen and Mina Farris)
